Panel 2

TRO Location

The Causey Development Trust have advanced a proposal to make West Crosscauseway a safer, more welcoming, pedestrian & cycle friendly place creating a distinctive city landmark at the edge of the World Heritage Site, drawing visitors beyond its boundary and connecting other key public spaces such as Holyrood Park and The Meadows. The Causey will become an asset to the Southside of the city of Edinburgh.

To progress the project a TRO - Traffic Regulation Order and RSO Re-determination Order are required to change Traffic Management (parking / vehicle movement / speed) and public right of passage.

The following 3 drawings have been prepared for the Orders.

This drawing shows the location within the road networks.
