

## **Matters Arising**

---

### **Noise from building sites** - Cameron Rose writes

Following the meeting earlier this week I have made a number of enquiries.

First, and confirming what some people at the meeting were already aware of, the Reporter who allowed the appeal imposed conditions and informatives on the granted permission. None of these addressed limiting the working hours – which are permitted as 7am to 7pm.

Nonetheless, I understand that the contractor has agreed to restrict the noisier operations until sometime after the 7am start – but I think some members of the Community Council will, by now, be aware of this.

I also indicated that I would be happy to be in touch with the project manager regarding the potential replacement of trees in Lutton Place as a measure of goodwill. I have made representation and await consideration of my letter.

Nicholas raised the issue of flipping the default time periods as regards working hours. I am still in correspondence about that and considering the issue.

Best wishes,

Cameron
